01 / SERVICE PACKAGE

Data Setup & Infrastructure Services

The technical foundation that makes your analytics possible.

Before any analysis can begin, your data needs to be properly properly connected, cleaned, and structured. This is the behind-the-behind-the-scenes engineering work that most analysts don't talk don't talk about — but without it, no dashboard, no report, and no and no insight is possible.

- *We handle this entirely. you don't need to touch a single line of code.*

01

CHAPTER ONE — THE FOUNDATION

Why data setup is the work that makes everything else possible.

No dashboard, no report, and no insight is possible without it. We handle this entirely.

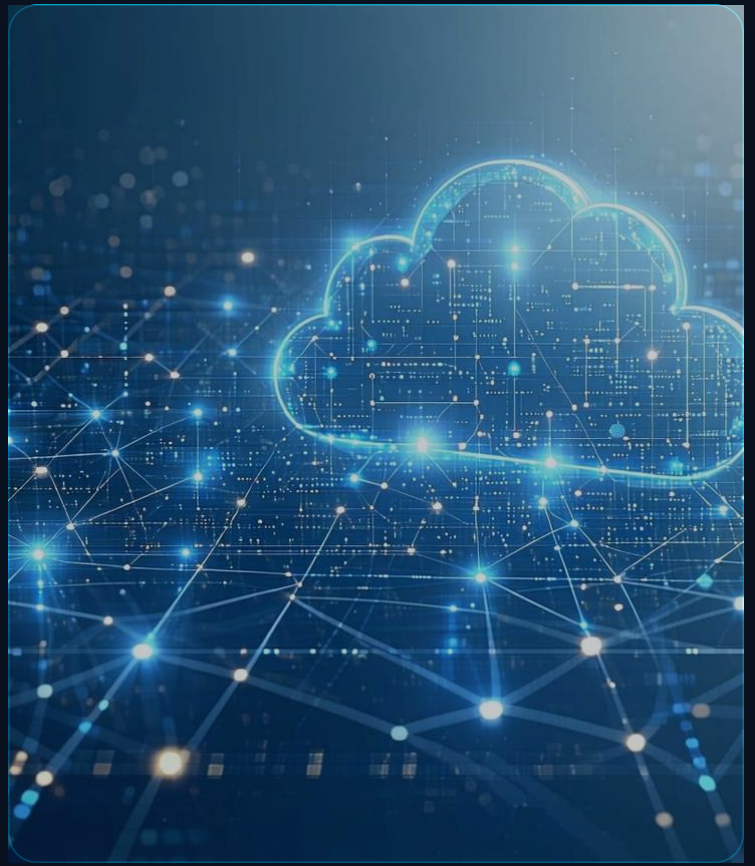

BEFORE THE ANALYSIS

Behind every insight is engineering most analysts never talk about.

Before any analysis can begin, your data needs to be properly connected, cleaned, and structured. This is the behind-the-scenes engineering work that most analysts don't talk about — but without it, no dashboard, no report, and no insight is possible.

We handle this entirely. You don't need to touch a single line of code. Your job is to make decisions on clean, connected, reliable data — our job is to make sure that data exists.

PLATFORMS WE CONNECT

1
UNIFIED SOURCE OF TRUTH

DEFINITION

What is a data setup?

When you hire us for any analytics engagement, your business data lives in multiple places — Shopify, Google Analytics, Facebook Analytics, Facebook Ads, Google Ads, Klaviyo. These platforms don't talk to each other automatically.

A DATA SETUP MEANS WE:

01 EXTRACT
Extract your data from every platform you use.

02 CLEAN
Clean and standardize it so everything speaks the same language.

03 MERGE
Merge it into one central database.

04 CONNECT
Connect it to your dashboard so you see one unified view of your business. business.

This is a one-time investment that pays for itself with every analysis and every decision that follows.

THE PROCESS

Four steps. One unified source of truth.

Every engagement begins with the same disciplined sequence. Each step compounds on the last — skip any one of skip any one of them and the foundation cracks.

WHY IT MATTERS

A one-time investment that pays for itself with every analysis and every decision that follows.

Setup is not an add-on. It is the foundation. Every insight we deliver, every dashboard we build, and every recommendation we make is only as good as the data underneath it. We make sure that foundation is solid - so everything built on top of it can be trusted completely.

1×

ONE-TIME INVESTMENT

No recurring setup fees for one-time time engagements.

15

INDIVIDUAL SERVICES

Pick only what your stack actually needs.

3

SETUP BUNDLES

Basic, Full Pipeline, or Full Pipeline + Pipeline + Automation.

02

CHAPTER TWO — INDIVIDUAL SETUP SERVICES

Fifteen services. Pay only for what your stack actually needs.

From cloud infrastructure to dashboard connection - every line item, every price range, no flat-rate surprises.

GROUP 01 — INFRASTRUCTURE & API CONNECTIONS

Services 1–6: stand up the cloud home and connect every platform.

01		**Cloud Infrastructure Setup** Create and configure your GCP project, enable billing, and set up your BigQuery database — the central home for all your business data. data.	$50 — $100
02		**Shopify API Connection** Build a secure private app, configure data access permissions, and establish a live connection to your store data.	$30 — $60
03		**GA4 API Connection** Set up service account credentials, configure secure access, and connect your Google Analytics data to your pipeline.	$50 — $100
04		**Meta Ads API Connection** Create your Facebook App, link your Business Manager, and establish a stable long-lived data connection.	$60 — $120
05		**Google Ads API Connection** Apply for developer access, link your manager account, and enable data extraction from your campaigns.	$50 — $100

PRICES REFLECT REAL VARIABILITY — FINAL PRICING CONFIRMED AFTER DISCOVERY

GROUP 02 — PIPELINE ENGINEERING & DATA QUALITY

Services 7–10: build the extraction pipeline and standardize the data.

06	X	**Klaviyo API Connection** Generate and secure your private API key and connect your email marketing data to the pipeline.	$20 — $40
07	⇄	**Data Pipeline Build (per platform)** Write the extraction script that pulls your data from each platform automatically — charged per platform connected.	$100 — $200
08	✦	**Pagination & Rate-Limit Handling** Build retry logic and loop handling so large data exports never fail or get cut off mid-pull.	$50 — $100
09	❄	**Data Cleaning & Standardization** Align column names, currencies, date formats, and timezones across all platforms so everything is consistent and comparable.	$50 — $100
10	✦	**Multi-Platform Merge Logic** Combine data from all your platforms into one clean master table — the single source of truth for all your reporting.	$80 — $150

ITEM 7 IS CHARGED PER PLATFORM — 3 PLATFORMS = 3 PIPELINE BUILDS

GROUP 03 — LOADING, AUTOMATION, SECURITY & CONNECTION

Services 11–15: load, automate, secure, and connect to your dashboard.

11 ☁ BigQuery Load Script
Build the automated script that uploads your cleaned, merged data into BigQuery on a defined schedule. **$50 — $100**

12 ◔ Automation & Scheduling ONGOING
Set up Cloud Scheduler or cron jobs so your entire data pipeline runs automatically — no manual work required. **$80 — $150**

13 ◔ Error Handling & Alert System ONGOING
Build a notification system that alerts you immediately if any part of the pipeline fails. **$50 — $100**

14 ⚿ Credential Security Setup ONGOING
Store all API keys and tokens securely using environment variables or Secret Manager — never exposed, never at risk. **$20 — $40**

15 ▦ Dashboard Data-Source Connection
Connect your BigQuery database directly to Looker Studio so your dashboard pulls live data automatically (dashboard design billed separately). billed separately). **$30 — $60**

ITEMS 12, 13, 14 ARE ONLY FOR ONGOING / RECURRING CLIENTS

03

CHAPTER THREE — SETUP BUNDLES

Most clients don’t need every individual service.

Three pre-packaged setups based on engagement type - pick the one that matches how you work with us.

ONE-TIME → ONGOING → LIVE

BASIC SETUP

For one-time analysis clients.

You need us to pull your data once, clean it, and use it for a single engagement. No automation required.

COVERS

- Cloud Infrastructure Setup
- Relevant Platform API Connections (2–3 platforms)
- Data Pipeline Build
- Basic Cleaning

ONE-TIME FEE

$150 — $300

TIMELINE	2–3 Business Days
ENGAGEMENT TYPE	One-Time Analysis

NO AUTOMATION INCLUDED

♛ *Best for: Starter & Growth Package clients.*

FULL PIPELINE SETUP

For ongoing and recurring clients.

You need a permanent, structured data pipeline that can be refreshed regularly regularly and used across multiple analyses over time.

COVERS — EVERYTHING IN BASIC, PLUS

- ✓ Cloud Infrastructure + API Connections
- ✓ Data Pipeline Build (per platform)
- ✓ Data Cleaning & Standardization
- ✓ Multi-Platform Merge Logic
- ✓ BigQuery Load Script
- ✓ Dashboard Data-Source Connection

ONE-TIME FEE

$500 — $900

TIMELINE	5–7 Business Days
ENGAGEMENT TYPE	Ongoing / Recurring

NO AUTOMATION INCLUDED — SEE BUNDLE 3

♛ *Best for: Advanced Package clients.*

FULL PIPELINE + AUTOMATION

For live dashboard and retainer clients.

You need your data to update automatically — every day, without any manual manual work. Your dashboard is always current, your pipeline never stops. stops.

COVERS — EVERYTHING IN FULL PIPELINE, PLUS

- Automated Scheduling
- Error Alerts
- Credential Security

Timeline · 7–10 Business Days

TOP TIER

ONE-TIME FEE

$700 — $1,200

TIMELINE	7–10 Business Days
ENGAGEMENT TYPE	Retainer / Live Dashboard

PIPELINE RUNS EVERY DAY — AUTOMATICALLY

Best for: Monthly Retainer clients & Advanced Package with Live Dashboard.

SIDE BY SIDE

Three bundles. One unified source of truth.

Use this matrix to map your engagement type to the right setup. Final pricing is confirmed after a brief discovery conversation.

Pick the bundle that matches your engagement type.

BASIC SETUP

For one-time analysis

$150 — $300

2–3 Business Days

- ✓ Cloud Infrastructure
- ✓ 2–3 Platform APIs
- ✓ Data Pipeline Build
- ✓ Basic Cleaning
- ✗ Multi-Platform Merge
- ✗ BigQuery Load Script
- ✗ Dashboard Connection
- ✗ Automated Scheduling
- ✗ Error Alerts
- ✗ Credential Security

BEST FOR: STARTER & GROWTH PACKAGE

FULL PIPELINE SETUP

For ongoing & recurring

$500 — $900

5–7 Business Days

- ✓ Cloud Infrastructure
- ✓ All Platform APIs
- ✓ Data Pipeline Build
- ✓ Basic Cleaning
- ✓ Multi-Platform Merge
- ✓ BigQuery Load Script
- ✓ Dashboard Connection
- ✗ Automated Scheduling
- ✗ Error Alerts
- ✗ Credential Security

FULL PIPELINE + AUTOMATION TOP TIER

For live dashboards & retainers

$700 — $1,200

7–10 Business Days

- ✓ Cloud Infrastructure
- ✓ All Platform APIs
- ✓ Data Pipeline Build
- ✓ Basic Cleaning
- ✓ Multi-Platform Merge
- ✓ BigQuery Load Script
- ✓ Dashboard Connection
- ✓ Automated Scheduling
- ✓ Error Alerts
- ✓ Credential Security

BEST FOR: MONTHLY RETAINER & LIVE DASHBOARD

04

CHAPTER FOUR — IMPORTANT NOTES

You only pay for what you actually use.

Four principles that govern how we scope, price, and deliver every setup engagement.

01

02

03

04

PRINCIPLES

Four principles that govern every setup engagement.

01

You only pay for what you actually use.

If your business runs on Shopify and Google Ads only — we connect those two those two platforms. You are never charged for platforms you don’t use. use.

02

Platform connections are charged per platform.

The Data Pipeline Build (Item 7) is priced per platform. A client using 3 platforms pays for 3 pipelines. A client using 5 pays for 5. No flat-rate surprises.

03

Automation is only for ongoing clients.

Items 12, 13, and 14 — scheduling, alerts, and security — are only relevant if your pipeline needs to run repeatedly over time. One-time analysis clients do not need these.

04

Complexity affects the final price.

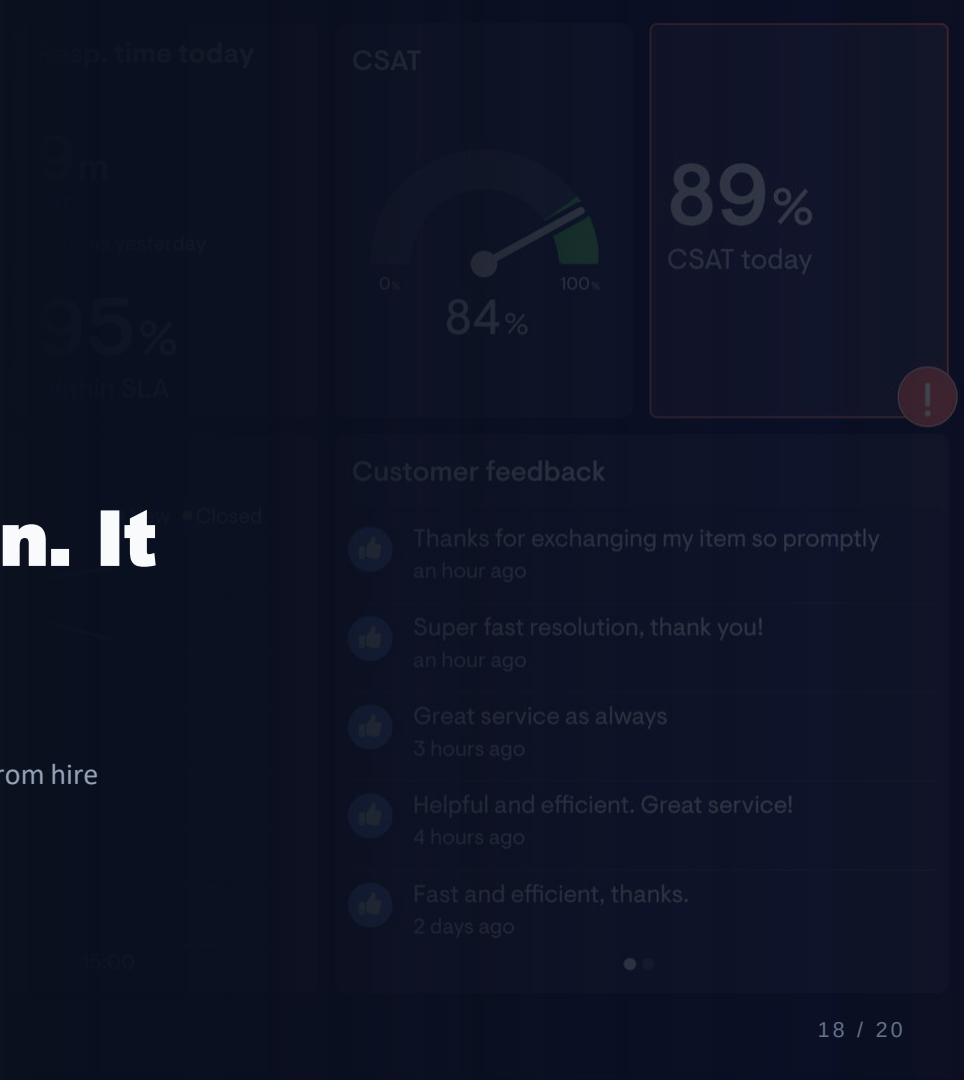

The ranges reflect real variability. A store with 500 SKUs and 3 years of historical data requires more work than a store with 50 SKUs and 6 months of data. Final pricing is confirmed after a brief discovery conversation.

05

CHAPTER FIVE — HOW SETUP FITS YOUR ENGAGEMENT

Setup is not an add-on. It is the foundation.

Every engagement flows through the same disciplined sequence — from hire to insight.

THE FLOW

Six steps from hire to insight.

Setup sits in the middle of this flow — completed first, before any analysis or dashboard work begins. It is the foundation that makes everything everything downstream trustworthy.

01 You hire us for an analytics package.
You select Starter, Growth, Advanced, or Monthly Retainer — the engagement type that matches your needs.

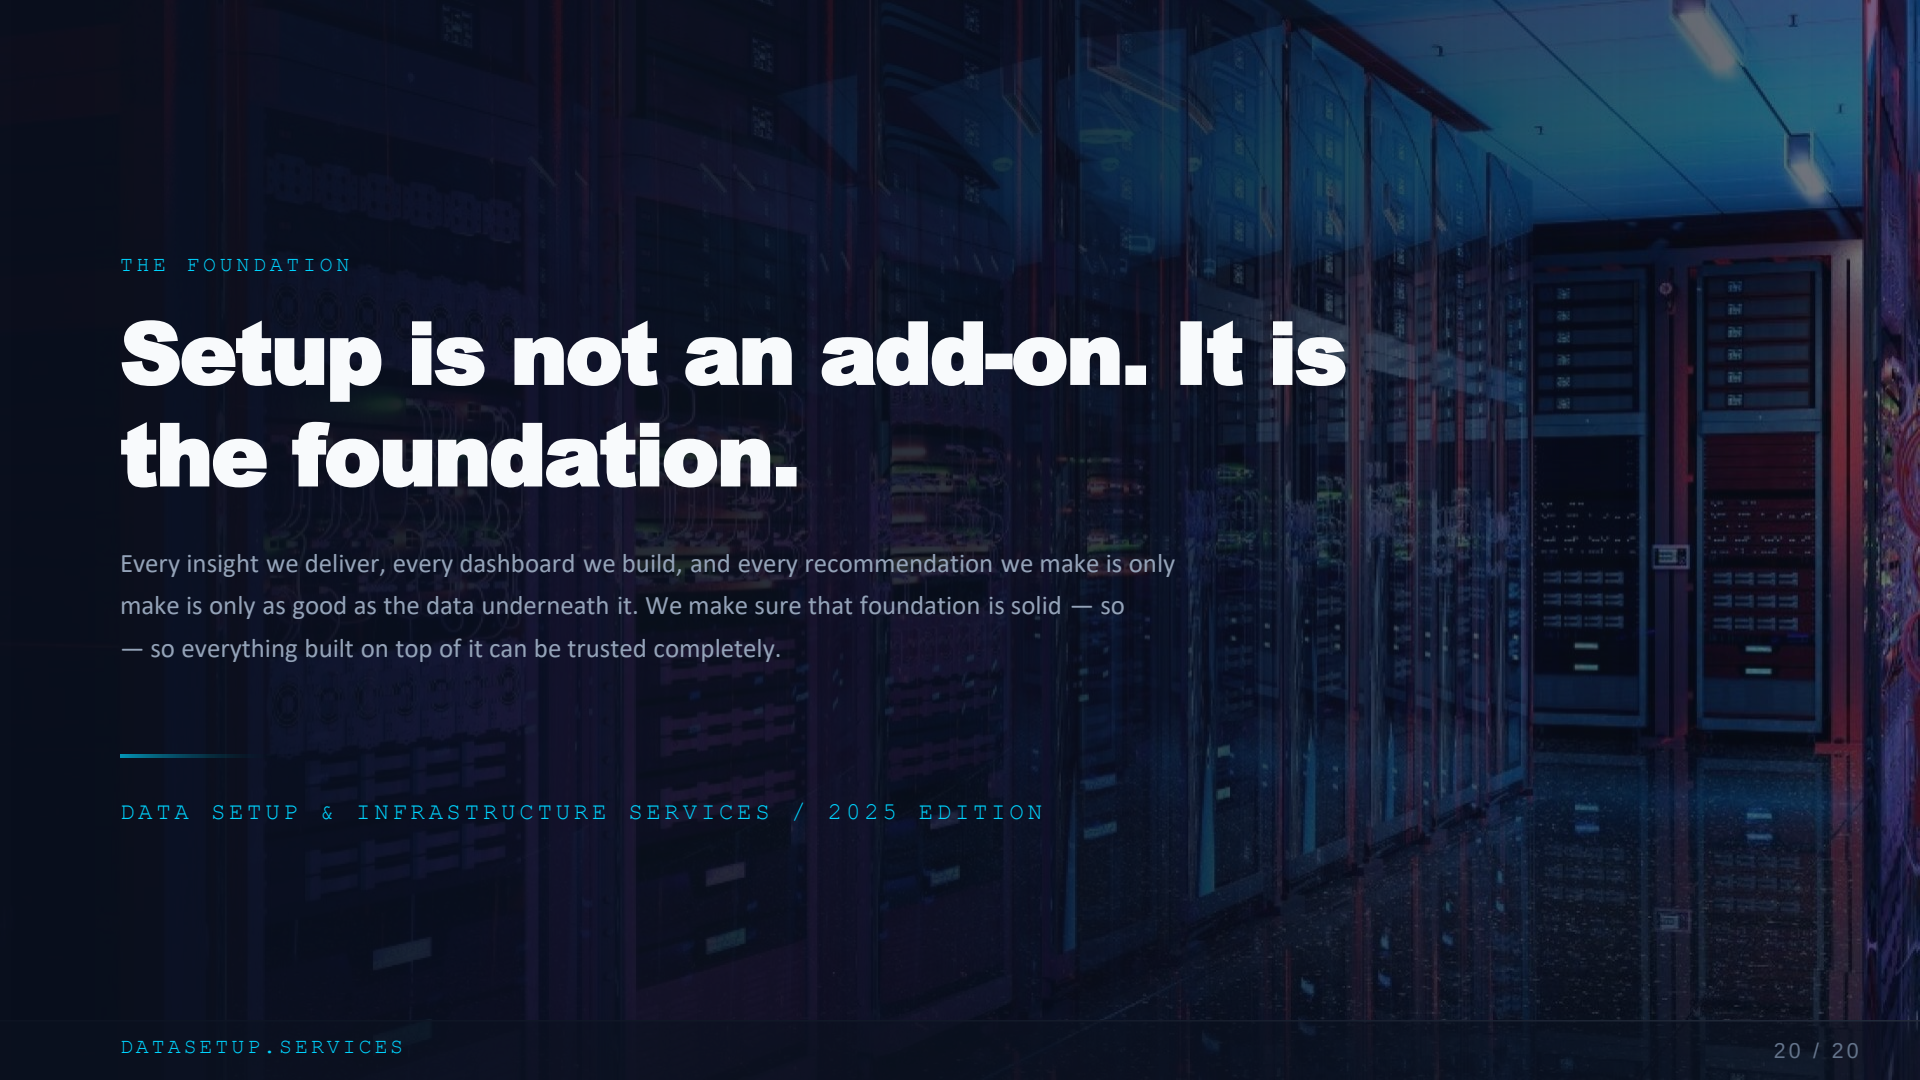

02 We assess which platforms you use.
Shopify, GA4, Meta Ads, Google Ads, Klaviyo — we map your stack and identify which platforms contain the data we need.

03 We recommend the right setup bundle.
Based on engagement type and platform count, we propose Basic, Full Pipeline, or Full Pipeline + Automation.

04 Setup is completed first (2–10 days). FOUNDATIONAL STEP
Cloud infrastructure, API connections, pipeline build, cleaning, merge, and (if applicable) automation — all done before analysis begins.

05 Analysis and dashboard work begins.
With clean, connected, reliable data in place, we build your dashboards and run your analyses on a foundation you can trust.

06 You receive insights built on clean, connected, reliable data.
Every insight, every dashboard, every recommendation — grounded in data you can trust because the foundation beneath it is solid.

THE FOUNDATION

Setup is not an add-on. It is the foundation.

Every insight we deliver, every dashboard we build, and every recommendation we make is only make is only as good as the data underneath it. We make sure that foundation is solid — so — so everything built on top of it can be trusted completely.
